Notes:

S = Supported with GA version. Functionality has been verified

S = Supported with E-distribution S

S1 = For Windows 10 you need to use SDK 16.0 SP02 PL02 or higher.

S2 = Supported from DB2 10.1.04 or later.

S3 = Available for 64bit platforms only

* The WRD is built using Java 8 targeting JRE 6 or higher and is verified using Tomcat 8. It requires a Java EE compliant web server that supports Servlet API, versions 2.3 through 3.1, using Java 6 or higher, preferably using the latest update of Java 8. For TLS connection with Uniface Router Java 8 or higher is required.

** Uniface C/C++ sources compiled with a C/C++ compiler depends upon the Operating System. Following compilers are used for the corresponding OS: MSVC for Windows, GCC for Linux, XL C/C++ for AIX, CCS C for Solaris. For compiling your 3GL applications we recommend to use the same or a compliant compiler version.

(+) The Uniface Anywhere product itself is not part of the distribution; mentioned versions are current at release time of this Uniface release

(++) Unicode enabled - import signature and recompile calling component(s) (see release notes)

(+++) CEF: Uniface htmlwidget uses the CEF version 81.3.3 with corresponding Chromium version 81.0.4044.138

NOTES:

Virtualization technologies: Uniface does not explicitly test or certify products running in virtual environments. More details are available on community.rocketsoftware.com/forums/uniface

Web browser Versions: We will provide support for browser versions which are generally available in the marketplace (and supported by the supplier). More details are available on community.rocketsoftware.com/forums/uniface

Uniface 64-bit client support is for deployment. More details are available on Uniface.info

DBMS connectors are tested to work against the indicated client versions
