Trademarks

Rocket is a registered trademark of Rocket Software, Inc. For a list of Rocket registered trademarks go to: www.rocketsoftware.com/about/legal. All other products or services mentioned in this document may be covered by the trademarks, service marks, or product names of their respective owners.

Examples

This information might contain examples of data and reports. The examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.

License agreement

This software and the associated documentation are proprietary and confidential to Rocket Software, Inc. or its affiliates, are furnished under license, and may be used and copied only in accordance with the terms of such license.

Note: This product may contain encryption technology. Many countries prohibit or restrict the use, import, or export of encryption technologies, and current use, import, and export regulations should be followed when exporting this product.

Corporate information

Rocket Software, Inc. develops enterprise infrastructure products in four key areas: storage, networks, and compliance; database servers and tools; business information and analytics; and application development, integration, and modernization.

Contacting Technical Support

The Rocket Community is the primary method of obtaining support. If you have current support and maintenance agreements with Rocket Software, you can access the Rocket Community and report a problem, download an update, or read answers to FAQs. To log in to the Rocket Community or to request a Rocket Community account, go to   www.rocketsoftware.com/ support. In addition to using the Rocket Community to obtain support, you can use one of the telephone numbers that are listed above or send an email to   support@rocketsoftware.com.

Contents

Chapter 1: Configuring promote reports for iASP

Set up Rocket DevOps promote reports that work with LMi in an iASP.

This task is only required if Rocket DevOps is installed on a different partition than LMi.

1. Switch to your iASP group:

```
SETASPGRP MYASPGRP
```

where *MYASPGRP* is your iASP group name.

2. Run this command:

```
CHGPRTF FILE(ACMSLIB/PRTFPROMOT) OUTQ(ACMSCTL/ALDONDMI)
```

where ACMS is the prefix of the LMi installed library. Note that the libraries above are a mix of ACMSCTL and ACMSLIB and should be configurable.
